PROFILE

Backend Developer with 2 years of professional experience building and maintaining production Laravel applications. Strong command of PHP OOP and SOLID principles, RESTful API design, relational database optimisation with PostgreSQL and MySQL, Redis caching and queue management, and Docker-based deployment. Experienced in designing backend systems that handle concurrent traffic across multi-vendor and multi-tenant platforms. Eager to apply backend engineering skills to location-based and geospatial services.

TECHNICAL SKILLS

Backend: PHP 8.x, Laravel 11, Eloquent ORM, Migrations, Queues, Java 17, Spring Boot 3.x
Database: PostgreSQL, MySQL, MongoDB, Redis, ProxySQL, Query Optimisation, Indexing
Geospatial: PostgreSQL PostGIS (familiar), Tile38 (learning), location-based query design
DevOps: Docker, Nginx, GitHub Actions CI/CD, Linux Ubuntu VPS
Architecture: Clean Architecture, Repository Pattern, Service Layer, CQRS, DDD, SOLID
Auth and RBAC: Laravel Policies, Gates, Spatie Permission, JWT, Role-Based Access Control
Frontend: Next.js 15, Vue.js 3, JavaScript ES6+, jQuery
Testing: PHPUnit Unit and Feature Testing, TDD
Integrations: bKash, Nagad, SSLCommerz, Stripe, PayPal, Pathao, Steadfast Courier APIs

PROFESSIONAL EXPERIENCE

Software Engineer - Auxtech Limited (Jul 2024 - Present)

- Developed and maintained 3 concurrent production Laravel 11 platforms: MVE marketplace, SASA multi-tenant SaaS, and E7 LMS; REST APIs for web and mobile under continuous traffic.
- Designed and optimised MySQL/PostgreSQL schemas via composite indexing, slow query analysis, eager loading, and ProxySQL read-write splitting; sustained 3x concurrent load.
- Configured Redis Cache-Aside with mutex locks and Laravel Queue/Horizon for async emails, PDFs, and notifications; reduced API response time 40% (800ms to 480ms).
- Built geolocation-aware shipping for all 64 Bangladesh districts; integrated Pathao and Steadfast courier APIs with webhooks and real-time tracking.
- Architected RBAC with Laravel Policies, Gates, and Spatie Permission supporting 5+ roles per platform.
- Integrated 6 payment gateways and 2 courier APIs with webhook handling, signature verification, and automated retry logic.
- Managed Ubuntu VPS with Nginx, Docker, and GitHub Actions zero-downtime CI/CD deployments.
- Collaborated with Next.js 15 and Vue.js 3 teams; maintained PHPUnit unit and feature test suites.

Software Developer Intern, Java Backend - Pro Info Sys BD (Jun 2023 - Dec 2023)

- Developed enterprise banking modules with Java Spring Boot: transactions, accounts, financial reporting.
- Resolved 50+ production defects; improved slow MySQL queries via indexing and restructuring.
- Achieved 80%+ unit test coverage with JUnit 5 and Mockito using TDD.

FEATURED PROJECTS

MVE - Multi-Vendor E-commerce Marketplace (Laravel 11, PostgreSQL, MySQL, Redis, Vue.js 3)

Production marketplace with vendor onboarding, 3-level commission engine, order/inventory management, and district-aware shipping for 64 districts. 4 payment gateways and 2 courier APIs with webhook retry logic.

SASA - Multi-Tenant SaaS Platform (Laravel 11, PostgreSQL, Redis, Docker)

Multi-tenant backend with Clean Architecture, CQRS, Domain Events, Redis mutex cache stampede prevention, and per-tenant Global Scopes. Tenant provisioning under 5 seconds via Laravel Jobs.

E7 LMS - Learning Management System (Laravel 11, MySQL, Redis)

LMS with course management, 3-role access control (Admin, Instructor, Student), enrolment workflows, and student progress tracking.

EDUCATION

Bachelor of Science in Computer Science, Green University of Bangladesh (2019-2023), CGPA 3.13/4.00
Relevant Coursework: DSA, OOP, Database Systems, Software Engineering, Web Development

ACHIEVEMENTS

- LeetCode: 150+ algorithmic problems (DSA, dynamic programming).
- HackerRank: 5-star SQL, 4-star Problem Solving, 4-star Java.
- Self-taught Docker, Redis, PostgreSQL, CI/CD, and system design alongside full-time work.
- Languages: Bengali (Native), English (Professional).
